

**Maersk Elliot; Additional Information for FONAR;**

During our efforts of looking for LSFO bunkers in the Caribbean Region, please kindly note our bunker department, contacted Peninsula Petroleum for inquiries into availability.

They advised us that there was no availability in Venezuela, Curacao, or Jamaica. All three ports we could and hoped to deviate to bunker LSFO prior to entering the ECA zone when we received word we would be calling Houston. POC within Peninsula is Mr. Eric Elliott, and our bunker department was in direct communication with him.

We have scheduled LSFO bunkers on arrival into Houston, and have pre-tested the stem, meaning we can burn these bunkers soon as possible. Total time burning HSFO, with a sulphur content of 2.35 is approximately 6.4hrs.
